Open Source Blog: My another Blog

written by Manoj Khanna | April 29, 2003

Its finally started! It was really sitting at the back of my mind – since the time I created RapidBlog, and now finally it is there – Open Source Blog. My recent entry OPEN SOURCE AND OUTSOURCING describes some points on open source and the outsourcing world and how they are coming together closer and better with everyday of the internet passing by.

Ah! Open Source.

UPDATE (June 05/2004): *This blog was merged later on with the existing blog. Unfortunately due to sudden site crash I was only able to save very few write-ups. You can find those in this blog with 'Open Source' subject.*
