Droppie Water

written by Manoj Khanna | July 15, 2006

I came across this interesting site, Droppie Water, while I was going through Drupal Forums. Although, I do not understand Dutch (believing it is Dutch as it sounds familiar when I was in Amsterdam), it sure made some bit of sense to me and the interactivity kept it alive. Great interaction and fine animation. Serves the right purpose for kids with different levels of grades. Understanding its about water it actually captures the subject pretty well. Took a best 30min of mine spending on this site alone.
